PROFESSIONAL SUMMARY

Project Manager, Next.js Full-Stack Engineer, and NestJS Backend Developer with 4+ years of hands-on experience designing and scaling web and mobile applications from small to enterprise levels. Co-founder of MarsCoders with a proven track record of leading distributed teams, managing Agile workflows, and engineering high-performance architectures using TypeScript, Next.js, NestJS, GraphQL, and modern database solutions.

TECHNICAL STACK

Frontend & Mobile: Next.js, React.js, React Native, TypeScript, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend & APIs: NestJS, Node.js, Express.js, GraphQL, RESTful APIs, Media Server Streaming

Databases & Tools: MongoDB, MySQL, PostgreSQL, Supabase, Git, GitHub, Slack, Figma

Methodologies: Agile/Scrum Management, Sprint Planning, Client Relations, Team Leadership

WORK EXPERIENCE

MarsCoders — Co-Founder, Project Manager & Lead Full-Stack Developer

Jan 2024 – Present

- Co-founded and lead a digital software agency delivering custom web and mobile solutions for local and international clients.
- Manage end-to-end product lifecycles, client requirements, sprint planning, UI/UX architecture, and seamless cross-functional team delivery.
- Engineer robust full-stack systems and backend microservices using Next.js, NestJS, TypeScript, GraphQL, and Supabase.

Learn in Box — Lead Developer & Backend Engineer (Remote)

Jun 2023 – Present

- Direct backend development and technical architecture for an American-Indian technology company specializing in educational box systems and freelance solutions.
- Design scalable backend APIs, modular microservices, and database schemas using Node.js and NestJS.

Microcis — Project Manager & Backend Engineer

Aug 2023 – Dec 2024

- Managed timelines, technical specifications, and Agile workflows for high-impact international software initiatives.
- Engineered specialized backend node services supporting real-time live streaming and media server integrations.
- Designed GraphQL API interfaces to optimize data retrieval pipelines and boost system response performance.

Rahanet ISP Co. — Full-Stack Web Developer

Mar 2022 – Aug 2023

- Developed and maintained core web systems following Agile frameworks for Afghanistan's premier internet service provider across 5+ provincial branches.
- Built CRM upgrades and web platform enhancements that elevated customer service operational efficiency by 40%.
- Migrated legacy web applications to modern stacks (React.js, Next.js, Node.js, MongoDB) to maximize performance and security.

EDUCATION & ACHIEVEMENTS

Herat University — Bachelor of Science in Software Engineering Graduated

- **Academic Excellence:** Achieved top university ranking among all peers with an average score exceeding 91%.
- **Certifications & Community:** Earned multiple professional credentials from online coding bootcamps and recognition for software development and social leadership.
